

## Cardiovascular Wellness Programs to Reduce Your Risk and Enhance Your Life

Cardiac Rehabilitation (Cardiac Rehab): a recovery and maintenance program to re-initialize healthy behaviors and activity levels after a cardiac event

### What do the programs entail?

- Medically accepted and approved protocol to develop life-changing habits that help prevent heart attacks or strokes
- 36 sessions over a course of 12 weeks, customized to fit each client's needs
- A team of exercise and health professionals guiding you every step of the way

### Am I a qualified candidate for these programs? \*

If you care about improving your health and mitigating cardiac risks, you are ready. We do work with a wide network of physicians and their patients, though you do not need a physician's referral or prescription to start the program.

### Who is part of the team?

1. Exercise Physiologist: Professionally supervised exercise with state-of-the-art equipment
2. Dietitian: Nutritional coaching to adopt an easily implemented, heart-healthy diet
3. Yoga and Meditation Expert: Stress management with mind and body relaxation techniques
4. Personal Concierge: Attentive care to ensure a comfortable and goal-achieving experience
5. Loved Ones: Family participation highly encouraged for incomparable support

#### VIP Treatment

Our process places you at the center of your care. Every Cardiac Prehab and Cardiac Rehab client will have a dedicated concierge that works closely with you to develop a personally tailored plan of care to address your specific wants and needs.

#### Constant Support

Ready to Begin? So are we. Avoid long waitlists and impersonal care in a hospital environment. As a private facility, we have the flexibility to not only begin immediately but to work around your schedule.

#### COVID Conscious

We are always up to date with the latest COVID-19 practices and maintain the safest environment possible for our clients.

## Am I a candidate for Cardiac Rehab?

If you have had a cardiac event, you have a cardiologist and have been released from the hospital and Phase I rehab, you are ready for Phase II. If you have been released by your doctor from Phase II rehab and are ready to exercise on your own, you are a candidate for Phase III with us and can book a no commitment session for a professional assessment.

**For more information or to refer a patient, please email [manager@thevillagesgym.com](mailto:manager@thevillagesgym.com), or call 832-649-3902 to enroll today.**

\* Patients with active heart failure are not candidates for this program and will need a physician's clearance to begin this program after treatment.
